Please add new Claims 27-45 as follows.

building structure exposed to transverse wind loading, the improvement comprising said wall structure containing a first layer having a density of about 0.5-3 lb./ft.³, a second, reinforcing layer selected from the group consisting of a polymer fabric and a biaxially oriented polymeric film directly bonded to the first layer and a cellulosic layer selected from the group consisting of paper, paper fiberboard, plastic-coated paper and plastic-coated paper fiberboard laminated to the second, reinforcing layer.

(New) The wall structure of Claim A, wherein an exterior layer is laminated to the cellulosic layer and an interior layer is laminated to the first layer.

(New) The wall structure of Claim 26, wherein said second, reinforcing layer is a biaxially oriented polymeric film.

(New) The wall structure of Claim 27, wherein said first layer comprises a foamed material.

1. (New) The wall structure of Claim 20, wherein said foamed material is an organic material.

(New) The wall structure of Claim 31, wherein said organic material is selected from the group consisting of polystyrene and polyurethane.

(New) The wall structure of Claim 27, wherein said layer comprises a fiberboard material.

4

(New) The wall structure of Claim 34, wherein said thermoplastic material is selected from the group consisting of polyethylene and polypropylene.

16. (New) The wall structure of Claim 14, wherein the polymer fabric is woven.

(New) The wall structure of Claim 21, wherein said second, reinforcing layer is a biaxially oriented polymeric film made of a thermoplastic resin.

(New) The wall structure of Claim 21, wherein the thermoplastic material is a polyolefin or a polyester.

(New) The wall structure of Claim 27, wherein the cellulosic layer has a plastic film formed thereon.

(New) The wall structure of Claim 27, wherein the cellulosic layer is impregnated with a member selected from the group consisting of a resin, an adhesive and mixtures thereof.

(New) The wall structure of Claim 40, wherein said cellulosic layer is impregnated with a urethane.

(New) The wall structure of Claim 40, wherein said cellulosic layer is impregnated with a polyester.

(New) The wall structure of Claim AU, wherein said cellulosic layer is impregnated with a urethane and a polyester.
